Education

Ontario Tech University **Expected Graduation: May 2028**

Bachelor of Science in Computer Science *Oshawa, Ontario*

- Courses: Data Structures & Algorithms, Object-Oriented Programming, Software Development and Integration, Software Design and Analysis, Web Applications Development, Database Systems & Concepts

Work Experience

Safran Landing Systems **Aug 2026 – Present**

Software Developer Co-op *Ajax, Ontario*

- Develop desktop and web applications on the Microsoft stack using **C#**, **ASP.NET**, and **JavaScript** in **Visual Studio**, with client-side interfaces built in **React** and **Vue**
- Design and administer **SQL Server** databases with **SSIS** and **SSRS**, build **Power BI** reports, and develop **SharePoint 2019/SE** workflows using **Nintex**
- Automate recurring administration tasks with **PowerShell** scripts, provide 2nd- and 3rd-level support for production solutions, and author handover documentation for project transitions

EMA Nonprofit Technologies **Mar 2026 – Aug 2026**

Software Engineer Intern *Toronto, Ontario*

- Shipped full-stack features for a Canadian fintech SaaS donation management platform, spanning a **Blazor** frontend, **C#** backend, **SQL Server** data layer, and **Azure** cloud infrastructure
- Developed a real-time administrative dashboard in **Blazor** and **C#**, transforming complex **SQL Server** transaction data into interactive **Chart.js** visualizations that update dynamically as new donation data is ingested
- Implemented secure authentication and **role-based access control** and refined CRUD workflows across the platform's core financial entities, hardening the application for its production pilot

Pharma 360 Solutions Inc. **Apr 2026 – Jul 2026**

Software Engineer Intern *Milton, Ontario*

- Built a real-time service health monitoring dashboard in **React** and **JavaScript** for a pharmaceutical operations platform, giving administrators at-a-glance visibility into backend service status
- Integrated live backend service data into the frontend with real-time updates, surfacing per-service success and failure rates through data-driven visualizations that translate raw metrics into an operational view
- Validated dashboard accuracy and performance against live data, and authored development documentation and a user guide to support handoff and ongoing maintenance

BrandLoveXM **Jan 2026 – Mar 2026**

Software Engineer Intern *Toronto, Ontario*

- Built **ContinuityOS**, an investor-ready platform prototype unifying multiple business management tools with intelligent automation to streamline operations during organizational transitions
- Developed the central executive dashboard in **Next.js** and **TypeScript**, surfacing key metrics across connected tools and backed by **Supabase** with secure authentication and role-based access control
- Integrated **LLM**-powered features including an automated weekly narrative that turns platform data into actionable business insights, and implemented **REST API** data synchronization with error handling and conflict resolution across connected apps

Projects

S&P 500 Market Predictor **Python | scikit-learn | pandas**

- Built a time series forecasting model using **scikit-learn**, **yfinance**, and **pandas** that achieved **72%** accuracy on historical S&P 500 data, validated with a custom backtesting engine simulating real-world trading

AI Therapist **Next.js | Flask | AWS**

- Built a real-time AI mental health assistant with a **Next.js** frontend, **Flask** API, and **AWS S3** storage, using **Gemini API**, **AWS Transcribe**, and **AWS Polly** for voice/text interactions at **95%+** speech-to-text accuracy

Technical Skills

Languages: Java, Python, C#, C++, JavaScript, TypeScript, SQL, HTML, CSS

Developer Tools: GitHub, AWS, Azure, Figma, SQL Server, VS Code, Jupyter Notebooks, Agile, Supabase

Libraries/Frameworks: React, Vue, Flask, Next.js, Node.js, TailwindCSS, .NET Core, Blazor
